- 7. Using GRAVITY PDF ..... 13

## 1. QUICK SETUP

---

### 1.1. INSTALL

---

- Upload and Activate the „**Gravity Forms QR Code**“ Plugin
- Setup a new feed for your form and define the fields to generate a QR code
- Define if you need to attach the QR Code with your notification eMails or confirmations

## 2. UPLOAD AND ACTIVATE

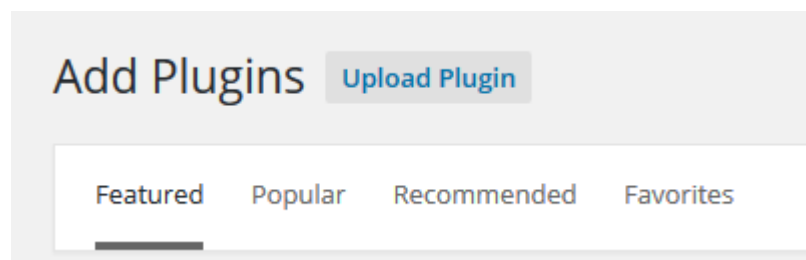

---

### 2.1. UPLOAD

---

After you downloaded and saved the '**Graviy Forms QR Code**' Plugin you have to upload it to your Wordpress installation.

Please go to you 'Plugins/Add New' Menu, select 'Upload' from the top links and choose the downloaded ZIP-File at the upload-field.

After selecting the File please press the „Install Now“ Button.

## 2.2. ACTIVATE

---

After the Plugin is uploaded you will get a success screen.

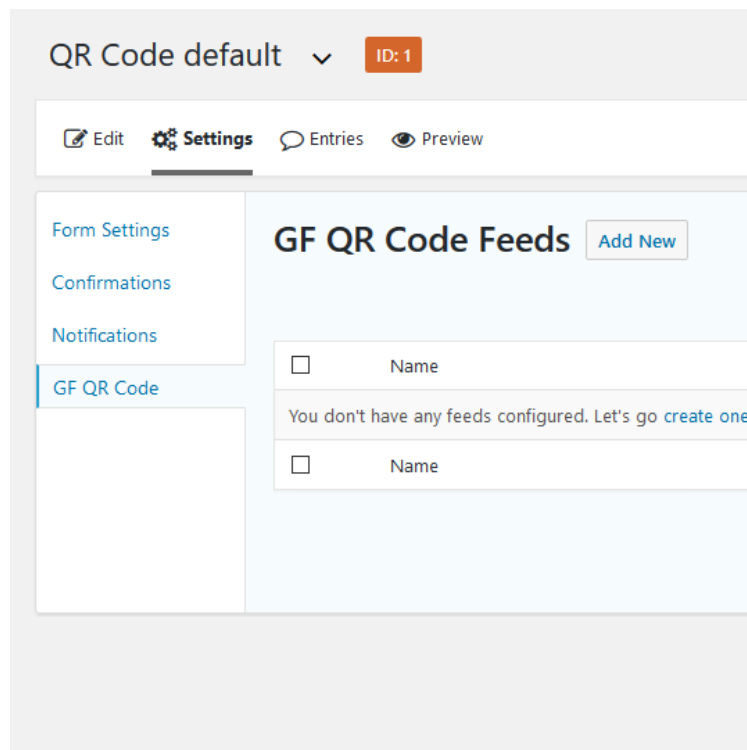

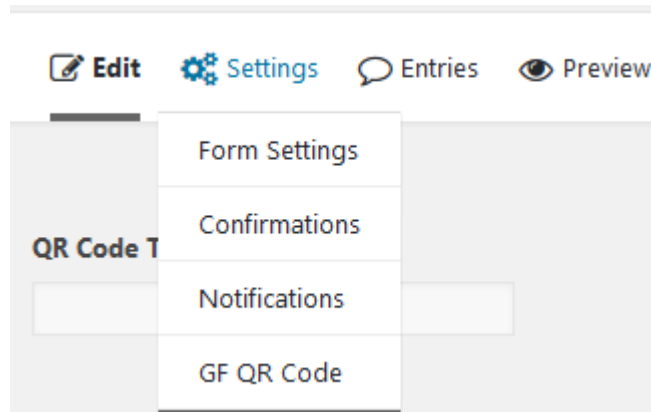

Please use the link „Activate Plugin“ to activate the plugin.

Or activate the plugin from your plugin menu.

<input type="checkbox"/> SP Gravity Forms QR Code <a href="#">Activate</a>	Use Gravity Forms to generate QR codes from submitted forms Version 1.0.0   By <a href="#">Ralf Fuhrmann</a>   <a href="#">Visit plugin site</a>
---	---

### 3. SETUP YOUR FORM AND FIELD SETTINGS

To generate a QR Code you need to add a new QR Code feed at the GF QR Code settings.

### 3.1. SETTING UP THE DATABASE TABLE

---

At the Gravity-Forms Feed Settings you have to setup a name for your feed, a label that will be displayed under the QR code and the size of the generated Image.

## Feed Settings

#### Default QR Code Fields

Feed name <sup>?</sup> *	<input type="text" value="GF QR Code Feed 1"/>
QR Code Label <sup>?</sup> *	<input type="text" value="Knoedel"/>
QR Code Size <sup>?</sup> *	<input type="text" value="200"/>
Feed Condition	<input checked="" type="checkbox"/> Enable Conditional Logic Process this data only if <input type="text" value="All"/> of the following match: <input type="text" value="Text 1"/> <input type="text" value="is"/> <input type="text" value="Enter a value"/> <input type="button" value="⊕"/>

#### Template Fields

Please select the needed fields from your form.  
It's possible to add any text as you need at the first field.  
You also can use the Placeholders {tab} to insert a TAB, {space} to insert a SPACE or {newline} to insert a NEWLINE.

QR Code Fields <sup>?</sup>	<input type="text"/>	<input type="text" value="Text 1"/>	<input type="button" value="⊕"/>	<input type="button" value="⊖"/>
	<input type="text"/>	<input type="text" value="Text 2"/>	<input type="button" value="⊕"/>	<input type="button" value="⊖"/>

---

<i>Field</i>	<i>Description</i>
<b>Feed Name</b>	A name for you feed.
<b>QR Code Label</b>	A small text that will be displayed under the QR code
<b>QR Code Size</b>	The size of the PNG Image file of the QR Code in pixel
<b>Feed Condition</b>	Add conditional logic to your feed processing

### 3.2. FIELD SETTINGS

---

At the “Template Fields” section you can setup the fields of the form that will be used as data to generate the QR Code.

You also can setup any text you need at the input field for any qr-code line.

Placeholders :

{tab} to insert a TAB

{space} to insert a SPACE

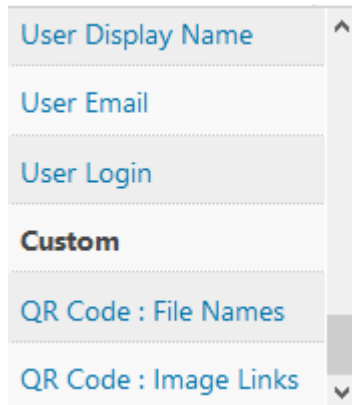

{newline} to insert a NEWLINE

#### 4. ADD YOUR QR CODE TO A CONFIRMATION

---

At the default Gravity Forms Confirmation Setting you can use two new Merge-Tags to insert your QR Code to your Confirmation.

<i>Merge Tag</i>	<i>Description</i>
<b>QR Code : File Names</b>	Will be replaced with the name of the generated QR Code files.
<b>QR Code : Image Links</b>	Will be replaced with a HTML Image (IMG) link of the generated QR Code files.

## 5. ADD YOUR QR CODE TO A NOTIFICATION

---

At the default Gravity Forms Notification Setting you can use two new Merge-Tags to insert your QR Code to your Notification ( See point 4 )

You also can attach the generated QR Code files as attachment to the Notification eMail.

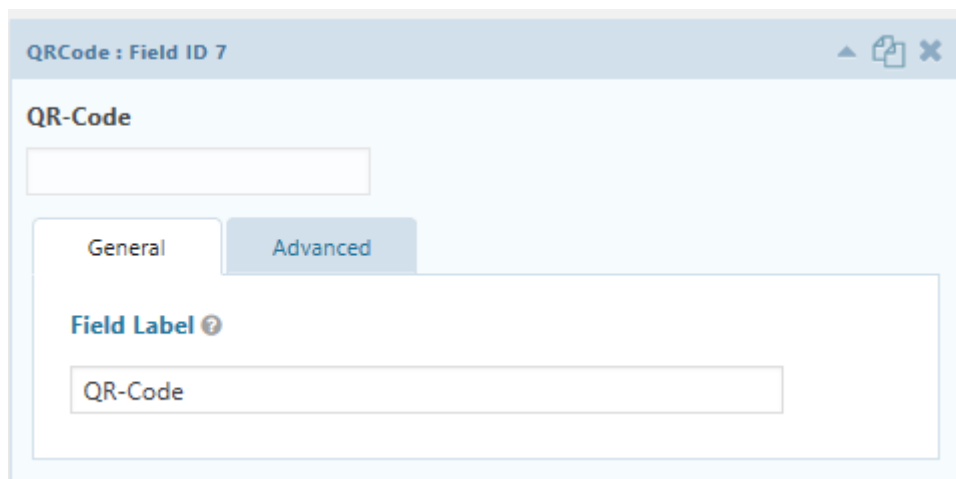

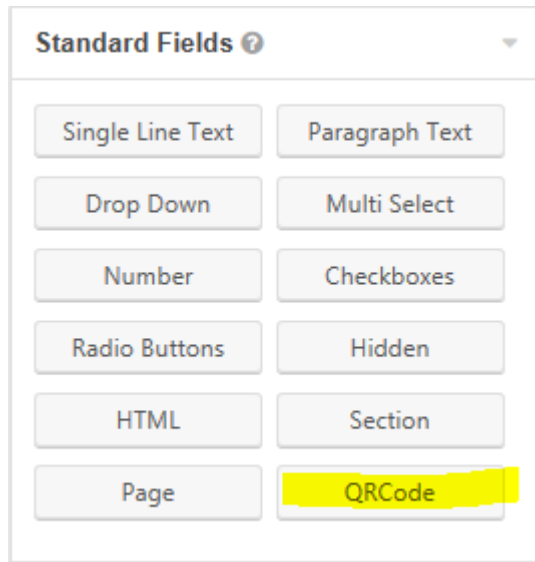

The screenshot shows a notification configuration interface. On the left, the text "Attach QR-Code" is displayed. To the right, there are two checked checkboxes: "GF QR Code Feed 1" and "GF QR Code Feed 3". Below these options is a blue button labeled "Update Notification".

## 6. USING THE QR-CODE FIELD

---

At the Form-Editor you'll have a new field to store the URL of the generated QR-Code. The field will be hidden at the Front-End Form.

With this new field it's possible to view the generated QR-Code from the Entry-List or der Entry-Details-Pages.
